

KUNJ YADAV

Senior Java Developer

Email: yadavkunj08@gmail.com | Phone: +91-8306602181
LinkedIn: <https://www.linkedin.com/in/kunj-yadav-b1449a135>

PROFESSIONAL SUMMARY

Senior Java Developer with 6+ years of experience at Fusion Softtech, working on full-stack applications using Java, Spring Boot, Python, and Django. Skilled in building microservices, REST APIs, and cloud-based solutions on AWS. Experienced in handling projects from planning to deployment, collaborating with teams, and maintaining clean, reliable code. Worked across healthcare, education, communication, and IoT domains, with an interest in solving practical technical problems.

TECHNICAL SKILLS

Programming Languages	Java, Python, JavaScript, SQL
Frameworks & Libraries	Spring Boot, Hibernate, Django, Django REST Framework, React, Angular, jQuery, Bootstrap
Databases	MySQL, MongoDB
Cloud Services	AWS (EC2, S3, Lambda, QuickSight, SNS), Azure VM, Azure Active Directory
Tools & Platforms	Eclipse, IntelliJ IDEA, Visual Studio, PyCharm, Postman, Git, GitHub, GitLab, Bitbucket, Jira, Asana, ClickUp
Specialized Technologies	Liferay Portal, Open edX, REST APIs, Microservices, JasperReports, Form.io, Raspberry Pi, IoT

PROFESSIONAL EXPERIENCE

Fusion Softtech

September 2019 – Present

Senior Java Developer

- Lead full-stack development of enterprise applications using Java, Spring Boot microservices, Python Django, and modern cloud infrastructure
- Implement RESTful APIs and microservices handling high-throughput communication workflows using reactive programming principles
- Design and develop cloud-native solutions on AWS utilizing EC2, Lambda, S3, QuickSight, and SNS for deployments
- Collaborate with business analysts and clients in Agile environment for requirement gathering, sprint planning, and backlog refinement

- Implement CI/CD pipelines using Jenkins, manage code reviews, and coordinate with DevOps teams for production deployments
- Build analytics pipelines and interactive dashboards using AWS QuickSight for data-driven business insights

Java Developer / Python Developer

- Developed enterprise healthcare and education applications using Spring MVC, Django, and Liferay portal frameworks
- Built and maintained REST APIs for seamless integration between multiple systems and third-party services
- Customized Open edX LMS platform with XBlock development, theme creation, and SSO integration using Microsoft Graph API
- Integrated payment gateways (PayPal, Braintree) with secure transaction management and PCI DSS compliance measures
- Created comprehensive unit and integration tests using JUnit, ensuring high code quality and test coverage
- Managed deployments on AWS EC2 and provided ongoing support for production environments

KEY PROJECTS & ACHIEVEMENTS

Routee – Cloud Communication Platform

Technologies: Java, Spring Boot Microservices, MongoDB, Angular, REST APIs, Jenkins, JUnit, Git

- Developed RESTful microservices for multi-channel communication platform supporting SMS, email, WhatsApp, and Viber messaging
- Implemented drag-and-drop HTML template builder and subscription quota management APIs for multiple messaging channels
- Integrated Braintree payment gateway for secure transaction processing
- Built real-time dashboards for monitoring communication metrics and implemented template export to Gmail, Outlook, and Zoho

MedicoDB – Healthcare Management System

Technologies: Java, Spring Boot Microservices, MySQL, JasperReports, Git, GitHub, ClickUp

- Developed REST APIs for patient, hospital, and clinical modules with comprehensive health report generation using Jasper Reports
- Led source code migration from Bitbucket to GitHub and created automation scripts for repository management across microservices

OmniLearn (LMS) & OmniEdu (EMS) – Education Platforms

Technologies: Python, Django, React, Liferay 6.2, Open edX, Form.io, AWS QuickSight, Docker, MySQL, MongoDB

- Customized Open edX virtual campus platform with XBlock development, theme creation, and custom MFE applications using React
- Integrated Microsoft SSO login and developed custom APIs for mobile application integration
- Built exam management system on Liferay portal with dynamic forms using Form.io, finance modules, and payment integration
- Integrated AWS QuickSight dashboards for comprehensive learning analytics and reporting

ECLAIRS Analytics – Data Visualization Platform

Technologies: AWS QuickSight, Python, AWS Lambda, MySQL

- Designed and implemented data pipelines integrating multiple database sources for business analytics
- Created interactive dashboards and widgets in AWS QuickSight with optimized SQL queries for data retrieval
- Developed datasets, filters, and calculated metrics translating business requirements into actionable insights

Additional Projects

- **NestCool (IoT):** Integrated Google Nest API with Python for smart AC control, implementing bidirectional synchronization on Raspberry Pi
- **Online Assessment Platform:** Built competency-based assessment system with Azure AD SSO, dynamic forms, WebRTC integration, and automated result generation
- **Transcript Management:** Developed semester-wise result calculation system with LMS synchronization and automated mark sheet generation
- **HelpXchange & Orchard:** Implemented Liferay-based platforms with e-commerce functionality, PayPal integration, and custom theme development

EDUCATION

Bachelor of Engineering in Computer

Gujrat Technological University | Graduated: 2019

CORE COMPETENCIES

- Full-stack development with expertise in Java, Spring, Python, and modern JavaScript frameworks
- Microservices architecture design and implementation using cloud-native patterns
- AWS cloud services deployment and management (EC2, Lambda, S3, QuickSight)
- Agile development methodologies with experience in sprint planning and cross-functional collaboration
- API design and integration including payment gateways, SSO systems, and third-party services
- Database design and optimization for both SQL (MySQL) and NoSQL (MongoDB) systems
